APPLICATIONS & SOLUTIONS ARCHITECT | ENTERPRISE SAAS PRODUCT DEVELOPMENT | GENAI & PLATFORM ENGINEERING

Enterprise/Applications architect with 15+ years delivering large-scale platform products in telecommunications (US T-Mobile, AT&T). Track record of taking products from concept to production and driving adoption — a real-time fraud-detection application (80% fraud reduction), a product-health visualization platform (50% internal adoption), and a microservices performance-monitoring tool (40% developer adoption). Skilled in API and microservices architecture, cloud-native design, event-driven integration patterns, and emerging GenAI/agentic application patterns. Brings identity/SSO integration depth (SAML/OIDC, FIDO2/passkeys) as a platform capability.
Hands-on delivery experience partnering across engineering, product, and business teams.

AREAS OF EXPERTISE

Application & Product Architecture: API development, microservices architecture, cloud-native on premise/SaaS design, prototyping & PoC-to-MVP delivery, product roadmap & lifecycle ownership, event-driven integration patterns

Cloud & Platform Engineering: AWS (Solutions Architect, Cloud Developer), Kubernetes/containerization,, distributed tracing & observability (OpenTelemetry)

GenAI & Emerging Technology: LLM application patterns, RAG/vector search, agentic systems, model selection & integration, AI evaluation & guardrails

Identity, Security & Compliance: SSO & federated identity (SAML/OIDC), passwordless authentication (FIDO2/passkeys), fraud prevention, cloud security

Delivery & Leadership: SAFe Agile, DevOps & CI/CD, cross-functional product & engineering collaboration, staff mentoring & development, client/RFP engagement, OSS/BSS modernization

PROFESSIONAL EXPERIENCE

T-Mobile USA | **Enterprise Architect** *Bellevue, WA: 2024–Present*

- Architect and own the product roadmap for customer identity and self-verification experiences across retail, digital, and assisted channels, partnering with product and engineering to ship features that reduce customer friction.
- Designed and delivered passwordless authentication capabilities (biometrics, passkeys/FIDO2, federated identity) as a core platform feature powering multiple customer-facing applications.
- Partner across business sponsors, engineering, and product teams to translate business requirements into shippable architecture and API contracts.
- Build and validate proofs of concept in distributed tracing/observability (OpenTelemetry) and passwordless authentication to de-risk platform decisions before engineering investment.
- Prototype GenAI-powered application patterns (LLM orchestration, RAG, agentic workflows) exploring new self-service product surfaces, with emphasis on model evaluation and guardrails.

Ascendion (Collabera) | **Cloud Solutions Architect, Products & Platforms Lead** *Redmond, WA: 2023–2024*

- Designed and built custom cloud-native applications and platform prototypes (OSS/BSS, CRM, payments, order-to-cash, provisioning) for top-tier clients including Verizon, AT&T, T-Mobile, Amazon, Lexis-Nexis, and Cisco — taking concepts from requirements to working PoCs.
- Partnered with client engineering, product, and marketing teams; authored SOWs and RFP responses that translated product vision into scoped delivery plans.
- Ran technical training workshops that converted into new product and platform engagements.

T-Mobile USA | **Principal Technical Product/Architect** *Bellevue, WA: 2012–2023*

- Owned end-to-end delivery of three internal products from concept to production: a real-time fraud-detection application (80% fraud reduction), a product-health visualization platform (50% internal adoption), and a microservices performance-monitoring tool (40% developer adoption).

- Led the microservices re-platforming of T-Mobile's billing and service layer, improving scalability and performance for customer-facing applications.
- Built and pitched a federated-identity/passwordless prototype to executive leadership; shipped as a platform capability adopted across 70% of enterprise applications.
- Defined and drove technology roadmaps aligned to corporate product strategy.

European Computer Telecoms (ECT) | **Director of Solutions, Telephony Solutions** *Dallas, TX: 2009–2012*

- Gained extensive technical depth working for this network-based voice solutions firm in Munich, Germany.
- Built a process that reduced production ring-back-tone (RBT) system error rates to less than 5% annually.
- Devised a new system architecture that led to $2M in software/hardware delivery with $5M projected year-over-year licensing revenue.
- Forged a partnership with a top wireless equipment provider and software vendor that drove $3M in annual sales.
- Trained the RBT customer operations team on accelerated system deployment, beating the target timeline by a full quarter.

EDUCATION & CERTIFICATIONS

Data Science/Machine Learning — University of Washington, Seattle

Executive MBA — University of Texas School of Management, Richardson, TX

BS, Physics & Materials Engineering — Ben-Gurion University of the Negev, Israel

Certifications & Training: How Transformer LLMs Work, DeepLearning.AI (Aug 2026) · Attention in Transformers: Concepts and Code in PyTorch, DeepLearning.AI (Aug 2026) · AWS Certified Solutions Architect (2024) · AWS Certified Cloud Developer (2024) · AWS Certified Cloud Practitioner (2019) · Machine Learning Specialization, Stanford University (2024) · Custom GPTs & OpenAI APIs for Developers (2023) · SAFe 5 Product Owner/Manager (2022)

AFFILIATIONS

Member, Israeli AI Community — a monthly peer group of AI practitioners from Microsoft, Amazon, and other top technology firms.
